

A 3D perspective view of a rectangular wooden frame. The frame consists of a base made of thick vertical posts and horizontal rails, with a top surface made of many thin, parallel slats. The structure is shown from an isometric perspective, highlighting its three-dimensional form.

Technical drawing of a rectangular floor plan. The overall dimensions are 2850.00 (width) by 1350.00 (height). The plan is divided into a grid of 1450.00 (width) by 1200.00 (height). The grid is composed of 1450.00 / 260.00 = 5.5769 segments (approximately 5.58 segments) and 1200.00 / 150.00 = 8 segments. The drawing shows a central area with a grid of 1450.00 by 1200.00, surrounded by a border of 260.00 by 150.00. The border is divided into three sections: 260.00, 1440.00, and 260.00 (width) and 150.00, 1350.00, and 150.00 (height). The central area is divided into three sections: 1450.00, 1450.00, and 1450.00 (width) and 1200.00, 1200.00, and 1200.00 (height). The drawing is a technical drawing of a rectangular floor plan with dimensions and grid lines.

Technical drawing of a reinforced concrete slab (NORMA REINFORCING) showing a grid of reinforcement bars. The drawing includes dimensions for bar spacing (80.00) and slab thickness (150.00). The grid is composed of 12 horizontal bars and 12 vertical bars, with a central 1200.00 x 1200.00 area highlighted in green. The total dimensions are 1500.00 x 1500.00.
