

The diagram is a detailed architectural floor plan of a building, showing the layout of air conditioning (AC) units and condensation pumps. The plan includes the following components and labels:

- klimatizace** (air conditioning) - Multiple instances of this label are placed throughout the plan, indicating the location of AC units.
- NÁSTĚNNÁ JEDNOTKA** (wall unit) - Labels specify the model and power of the units, such as PM12SP.NSJ (0,9-4,04 kW) and PM18SP.NSK (0,9-5,53 kW). Some units are noted as being mounted on the wall under the eaves ("ZAVĚŠENA NA STĚNĚ POD STROPĚM MÍSTNOSTI").
- VENKOVNÍ SPLIT** (outdoor split) - Labels specify the model and power of the outdoor units, such as PM12SP.UA3 and PM18SP.UA2. Some units are noted as being mounted on the frame on the ground ("UMÍSTĚN NA RAMU NA PŮDĚ").
- ČERPADLO KONDEZÁTU** (condensate pump) - Labels specify the model and power of the pumps, such as DELTA PACK 10CE01UN23. Some pumps are noted as being mounted in the corner of the plastic frame ("ZABUDOVANÉ V ROHU PLASTOVÉ LÍŠTY").
- GUMOVÁ HADIČKA** (rubber hose) - Labels specify the diameter of the hoses, such as DN15 and DN25.
- STÁVAJÍCÍ ARKÝŘ** (existing archway) - Labels indicate the location of existing archways in the building's structure.
- VÝÚSTĚNÍ KONDEZÁTU PŘES ARKÝŘ NA STŘECHU OBJEKTU** (condensate outlet through archway to roof of the object) - Labels indicate the location of the condensate outlet through the archway to the roof of the object.

The plan also shows the location of the units relative to the building's structure and the placement of the condensation pumps. The units are connected to the pumps by hoses, and the pumps are connected to the roof of the object by archways. The plan is a technical drawing, showing the layout of the AC system in a clear and concise manner.

ČERPADLO KONDENZÁTU
DELTA PACK 10CE01UN23
(ZABUDOVANÉ V ROHU PLASTOVÉ LIŠTY)
