

Technical drawing of a circular machine component, likely a pump or turbine housing, showing a cross-section. The drawing includes the following details:

- Dimensions:**
 - Overall diameter: 1600
 - Inner diameter: 1000
 - Radial thickness of the main body: 200
 - Flange thickness: 100
 - Flange outer diameter: 1600
- Material and Sectioning:**
 - The main body is shown with diagonal hatching, indicating a specific material or section.
 - The flange is shown with a different hatching pattern, indicating a different material or section.
- Assembly Details:**
 - A central shaft or rotor is shown passing through the center of the component.
 - Two large bolts are shown securing the flange to the main body.
 - A small circular feature (possibly a seal or gasket) is located at the center of the flange.
- Annotations:**
 - A dimension line indicates a 5% tolerance or deviation.
 - Section lines I-I and II-II are shown, indicating the planes of sectioning.
