SW Category	A) Licences under a licence agreement with precisely specified conditions (e.g. real, temporal or territorial restriction), the right to use computer programs (software), upgrade of the software, or other rights to use any copyrights and rights related to copyright where: The software and its upgrade is a specific (custom) software product created specifically for the particular customer – eustream, a.s., or adjusted to eustream's conditions according to its requirements, and these adjustments were significant
	B) Licences under a licence agreement with precisely specified conditions (e.g. real, temporal or territorial restriction), the right to use computer programs (software), upgrade of the software or other rights to use any copyrights and rights related to copyright where: The software and its upgrade is a standardized product which can be purchased by any customer and is designed for a sale to a previously unknown customer. The product was not created specifically for a particular customer resp. was not adjusted for the individual customer – eustream, a.s., based on its requirements. Resp. the adjustments of software were not adapted significantly and only related to the installation of the software on the customer's hardware
